Thought for Thought
Great Opportunities to help others seldom come, but small ones surround us every day. - Sally Koch

Tips & Information
Isaac Newton was one of the world's greatest scientists because he took his ideas, and the ideas of earlier scientists, and combined them into a unified picture of how the universe works. Some of you may have heard the story of the apple falling on his head & him coming up with the Universal Law of Gravitation, well thankfully it did not hit his head, it just fell from the tree in front of him. That is where his idea of the "force" of gravity started. To this day he is still known as a great mathematician and physicist. In 1687, he published Philosophiae Naturalis Principia Mathematica.
